11. (Twice amended) A motor/generator comprising:

a first rotor provided with a plurality of magnetic poles by a magnet;

a second rotor provided with the same number of magnetic poles as the first rotor by a magnet, the first and second rotors being coaxially and concentrically disposed and rotatable independently of each other;

a stator provided with a plurality of stator coils applying a rotational force on the first rotor and the second rotor when a composite polyphase alternating current is supplied to the stator coils; and

a device which limits the rotation of the second rotor in a specified direction.

**REMARKS**

Applicant respectfully requests that the foregoing amendments be made prior to continuing the examination of the present application. After amending the claims as set forth above, claims 1 - 14 are now pending in this application.

Applicant wishes to thank the Examiner for the courtesy extended in conducting an interview on October 15, 2002 regarding claims 1 and 11. Claims 1 and 11 have been amended in accordance with wording suggested by the Examiner during that interview. Specifically, the words "and concentrically" have been added to independent claims 1 and 11 in order to further distinguish these claims from the cited references. The other changes made to claim 1 are the same as those requested after final which the Examiner indicated in an Advisory Action were not entered.

Applicant notes with appreciation the Examiner's allowance of claims 12 - 14 in the Final Office action received prior to filing of the RCE. Claims 12 - 14 remain in allowable condition.

Applicant believes that the present application is now in condition for allowance. Favorable reconsideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.

Respectfully submitted,
